|-------------------------|--|
| <b>Vacancy number</b>   | Innatoss 2021.002  |
| <b>Vacancy</b>          | <b>(Senior) Scientist Immunology (0.8-1.0 FTE)</b>   |
| <b>The company</b>      | <p>Innatoss Laboratories (<a href="http://www.innatoss.com">www.innatoss.com</a>) is a research-intensive small company that is specialized in diagnostics for Lyme disease, COVID-19 and Q fever. Innatoss has its own ISO 15189-accredited laboratory at the Pivot Park in Oss, the Netherlands.</p> <p>Innatoss focusses on early detection of infectious diseases, in order to prevent long-term health care issues. Our diagnostics group supports employers in their effort to control Lyme disease and we recently started with a similar program for COVID-19.</p> <p>Innatoss contributes to development of new diagnostic tests in our areas of expertise, as part of national and international collaborations. E.g., we support a vaccine development program for Q fever in collaboration with hospitals, universities and SMEs in the USA, the UK and Australia.</p> <p>Testing people at risk in combination with the introduction and development of cutting-edge human in vitro diagnostics allows us to better understand what tests are fit for what purpose.</p> <p>We are driven by making a difference for patients and to reduce healthcare issues associated with infectious diseases.</p> |
| <b>The position</b>     | <p>We are looking for a (senior) scientist, who has experience and a great interest in immunology and infectious disease, to complement our team</p> <p>The scientist will become part of ongoing international collaborations on Q fever and COVID-19. In addition, he/she will lead our efforts on cell-based immunity tests. Publication of results is part of the job.</p> <p>At Innatoss you will work in a team of about 10 people in which every member counts. Being an ambitious, but small, organization we need our employees to be flexible, versatile and stress-resistant.</p>   |
| <b>Your Profile</b>     | <p>Academic degree in the medical or biological field (MD, PhD). Experience in immunology or infectious diseases.</p> <p>Experience with working with human materials and ethical aspects of clinical research</p> <p>Strong project management skills</p> <p>Good communication skills, both oral and in writing.</p> <p>Fluency in English is required, working knowledge of Dutch is a nice to have.</p>  |
| <b>What do we offer</b> | <p>Salary in line with experience</p> <p>Flexible workplace</p> <p>Space to learn and grow on the job</p> <p>Great, flexible team</p>  |
